

Co-operative Housing Federation (CHF) of Canada

Modular and prefabricated construction methods for co-operative housing development

Join CHF Canada for a virtual education series introducing modular and prefabricated co-operative housing development.

These sessions are designed for anyone interested in learning about recent co-operative housing development projects that incorporated prefabricated construction and newly developed tools to help groups explore this modern method of construction for their project. Find out what worked and what to consider when building modular co-op homes.

Individuals or groups can register for one or all the sessions based on interest. Click on the session titles below to register.

- **March 5** [What is Prefabricated & Modular Housing?](#) (EN)
- **March 10** [Qu'est-ce que le logement préfabriqué et modulaire?](#) (FR)
- **March 12** [Modern construction methods in action](#) (EN)
- **March 24** [Modern construction fundamental tools](#) (La traduction simultanée de l'anglais au français sera disponible.)

Bring your questions and your curiosity. You'll gain practical knowledge and support for your co-operative housing development journey.
